

What is male-female sex?

Silly question or?

Sex has many dimensions-more than you think
children. Ok

fun. ok.

Cheap fun. Ok

for men it is lalso ike food. You need it. For many many years.

Sex is also like a desire for death for a man.

So many are not afraid of risks to get it-

You are loosing self control/ its good to be beside your lovely wife afterwards.

You are connected to her emotions.

Because it is like death- many men do silly things to get sex.

Before death- nothing is important.

This is one reason for increasing violence- a unfulfilled desire for this short death-called sex.

Its also a play of dominance and submission.

We need it in our relationship.

But she also dominates you.

You need her sex like a junkie his drugs.

You are not yourself anymore. She is a part of you.

If you dont have a wife. Ok it is at is .

Women are busy nowadays. Social media. Phone. Business.mails.

If you have to wait and if you have to say 'please ' you are in a bad position.

You transfer to a child. You dont like it. More and more you get female.

Perhaps you begin to drink.
